

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) An adhesive composition obtained by mixing:

- 100 parts by weight of at least one organic polymer (A) having moisture cross-linkable reactive silane terminal functions, and

- 1 to 70 parts by weight of at least one organic polymer (B) comprising no reactive silane functions, ~~which~~

wherein the organic polymer (B) is miscible at ambient temperature with polymer (A), and is selected from among comprises a polyesters, a polyethers, a polyurethanes, polyacrylates, a polyethylenediimines, a polycarbonates, a polyureas, or a polyamides or mixtures thereof.

2. (Currently Amended) The adhesive composition ~~as claimed in of~~ claim 1, ~~characterized in that wherein the organic polymer (A) is selected from among the following polymer chains comprises:~~

- (1) homopolymers and copolymers obtained from at least one monomer of the alkyl (meth)acrylate type comprising an alkyl radical having between 1 and 15, preferably between 1 and 10, carbon atoms;

- (2) polyoxyalkylenes of molecular masses ~~of between~~ ranging from 500 and to 30,000, ~~preferably between 3000 and 15,000;~~

- (3) polyurethanes obtained by condensation of a polyol, ~~preferably of the polyether and/or polyester type,~~ with polyisocyanates.

3. (Currently Amended) The adhesive composition ~~as claimed in of~~ claim 2, ~~characterized in that wherein~~ the copolymers (1) are obtained from ~~other~~ monomers[,] ~~such as including~~ styrene derivatives, vinyl ethers, ~~or~~ (meth)acrylic acids, which may be used in ~~contents of amounts~~ up to 50% by weight relative to the combined total ~~weight~~ of the monomers.

4. (Currently Amended) The adhesive composition ~~as claimed in of~~ claim 2, ~~characterized in that wherein~~ the polyoxyalkylenes (2) are polyoxyethylenes or polyoxypropylenes.

5. (Currently Amended) The adhesive composition ~~as claimed in one of claims 1 to 4 of~~ ~~claim 1, characterized in that wherein~~ the organic polymer (A) comprises at least one hydrolyzable silicon-containing group.

6. (Currently Amended) The adhesive composition ~~as claimed in of~~ claim 5, ~~characterized in that wherein~~ the hydrolyzable silicon-containing group is a silyl group of the formula:

in which:

- a is an integer ~~ranging~~ from 0 to 2,

- R is a monovalent hydrocarbon radical and

- X is a hydrolyzable radical.

7. (Currently Amended) The adhesive composition ~~as claimed in one of claims 1 to 6 of claim 1, characterized in that wherein~~ the organic polymer (B) ~~is selected from among comprises a~~ polyesters, ~~a~~ polyurethanes ~~and a~~ polyethylenediimines, or mixtures thereof.

8. (Currently Amended) The adhesive composition ~~as claimed in one of claims 1 to 7 of claim 1, characterized in that wherein~~ the polymer (B) is at least partially crystalline.

9. (Currently Amended) The adhesive composition ~~as claimed in one of claims 1 to 8 of claim 1, characterized in that wherein~~ the polymer (B) has a mean molecular mass ~~of between ranging from~~ 500 ~~and to~~ 1,000,000, ~~preferably between 2000 and 100,000, and more preferably between 2500 and 50,000.~~

10. (Currently Amended) The adhesive composition ~~as claimed in one of claims 1 to 9 of claim 1, characterized in that wherein~~ the quantity of polymer (B) ~~is between~~ ranges from 3 ~~and to~~ 50 parts per 100 parts of (A).

11. (New) The adhesive composition of claim 2, wherein the polyoxyalkylenes have molecular masses ranging from 3,000 to 15,000;

12. **(New)** The adhesive composition of claim 2, wherein the polyurethanes are of the polyether and/or polyester type.

13. **(New)** The adhesive composition of claim 2, wherein the polyoxyalkylenes have molecular masses ranging from 3,000 to 15,000, and the polyurethanes are of the polyether and/or polyester type.

14. **(New)** The adhesive composition of claim 9, wherein the polymer (B) has a mean molecular mass ranging from 2,000 to 100,000.

15. **(New)** The adhesive composition of claim 15, wherein the polymer (B) has a mean molecular mass ranging from 2,500 to 50,000.

16. **(New)** An adhesive composition comprising:

- 100 parts by weight of at least one organic polymer (A) having moisture cross-linkable reactive silane terminal functions, and

- 1 to 70 parts by weight of at least one organic polymer (B) comprising no reactive silane functions,

wherein the organic polymer (B) is miscible at ambient temperature with polymer (A), and comprises a polyester, a polyether, a polyurethane, a polyethylenediimine, a polycarbonate, a polyurea, a polyamide, or mixtures thereof.

17. **(New)** An adhesive composition obtainable by mixing:

- 100 parts by weight of at least one organic polymer (A) having moisture cross-linkable reactive silane terminal functions, and

- 1 to 70 parts by weight of at least one organic polymer (B) comprising no reactive silane functions,

wherein the organic polymer (B) is miscible at ambient temperature with polymer (A), and comprises a polyester, a polyether, a polyurethane, a polyethylenediimine, a polycarbonate, a polyurea, a polyamide, or mixtures thereof.
